

# UniBox U-100

## Network Access and Bandwidth Controller

UniBox is an intelligent access controller or hotspot gateway that provides complete control on your wireless network. UniBox allows network administrators to centrally manage wired and wireless networks, avoid unauthorized access and track real-time activity on the network.

UniBox U-100 comes with a captive portal engine, bandwidth control, policy manager, URL tracker, billing system, voucher management, URL filtering, reporting and advertisement engine. UniBox can be operated in stand-alone or remote RADIUS mode where it seamlessly interfaces with WIFILAN Cloud hotspot manager.

UniBox U-100 belongs to a family of UniBox controllers that is specially designed for managing network access in small venues like cafes, restaurants, small hotels/inns, training institutes, small offices and public Wi-Fi hotspots. U-100 is capable of handling 100 concurrent user sessions and is built on reliable Linux platform to provide high availability and performance for small-sized networks.
